### PKB136L, PKB136R Integrated Bottom Mount Refrigerator Panel Kit Installation Instructions

### **Introduction**

# 

To avoid personal injury and property damage, observe all safety instructions.

To avoid personal injury, protect hands and arms by wearing gloves while installing trim kit.

To avoid property damage, protect soft vinyl or other flooring with cardboard, rugs, or other protective material.

Read entire manual before installing kit. Confirm all parts listed are included in kit. If parts are missing, contact source from whom kit was purchased.

#### Important

- Mechanical experience is required to install trim kit.
- Depending on installer's knowledge and skill, installation can take from one-half to one hour.
- If unable to solve a problem during installation, contact source from whom kit was purchased.

## Procedure

1. Slide out refrigerator handle screw insert and remove handle by removing screws with a Phillips screwdriver.

2. Align panel in groove between top and bottom trim and push evenly. Start at one end and work across door. If panel binds loosen top door trim. Adjust panel and retighten.

#### **IMPORTANT**:

Do not remove corrugate from back of panels. Panels will not fit properly if corrugate is removed.

- For ease of installation, two people are required to lift and guide panel into trim. Install one panel at a time.
- For smoother installation apply bar soap on door trim and panel.
- 3. Reinstall handle with screws removed in step 1. Install handle screw insert by starting at one end and working upward along the full length of handle.

 Slide out handle screw insert from top of freezer drawer. Remove freezer drawer handle screws. Remove handle. Handle is in two pieces, reassemble if handle pieces come apart.

5. Align panel in groove between left and right freezer drawer trim. Push evenly. If panel binds loosen Freezer drawer side trim. Adjust panel and retighten.

#### **IMPORTANT**:

Do not remove corrugate from back of panels. Panels will not fit properly if corrugate is removed.

- For smoother installation apply bar soap on door trim and panel.
- Reinstall handle by replacing screws removed in step
  Install handle screw insert by starting at one end and working across the full length of the handle.
- 7. Peel off protective film from the front of decorator panels.
