

# Cluster II™

### HALOGEN LAMP WARNING!

This fixture is fitted with halogen lamps which are highly susceptible to damage if improperly handled. Never touch lamp with bare fingers as the oil from your hands will shorten lamp life. Also, never move fixture until lamp has had ample time to cool. Remember, lamps are not covered under warranty conditions.

Thank you for purchasing this American DJ® product. For your convenience this lighting effect has been lamped and is ready to be used, there is no assembly required. Please read the following instructions before installing or using your new unit.

### Operating Instructions:

Unit is ready to be hung or set on the ground. After plugging in unit, the lights will react to the music via the sound active internal microphone. Ideal for large venues, the Cluster II™ is a super centerpiece, much like the ADJ Sunray II™, but with color. This unit produces sharp multi-dichroic colored beams of light projected from small lenses. Inside the Cluster II™ is a pyramid of dichroic glass that rotates back and forth via sound activation. The Cluster II™ also features a mounting bracket, music sensitivity knob, and has no transformer, making it light in weight.

Please follow Duty Cycle for optimum performance of this lighting fixture.

**To replace lamp:** unscrew knobs on the head of the fixture. Replace bulbs; reassemble.

For service, contact your American DJ® dealer.

**Caution!** Always disconnect from main power before replacing lamps or servicing unit. Remember to always replace with same lamps and fuses.

**Duty Cycle: 10 min. on 10 min. off**

### Model: Cluster II™

#### SPECIFICATIONS:
