

## KLIPPAGGREGAT TITAN

### AGGREGAT 155 H TITAN DOD

## Aggregat 155 H Titan DOD

---

A full size cutting deck for Titan with the brand new DOD feature.

The 155 H Titan DOD is of course front-mounted for full over-view and easy access. Three free rotating blades with Multiclip function will cut the grass with excellent result.

Thanks to the Discharge On Demand (DOD) feature the operator can change from Multiclip to rear discharge and back using a lever on the dash board. No need to leave the driver's seat or to stop cutting. You instantly adjust the cutting mode to the conditions.

The deck is extremely sturdy with a solid frame as protection. The deck adjusts up and down while the frame stays in the same position. The deck can be raised and angled into cleaning or service position and the cutting width is 155 cm. Can be equipped with extra scalping protections.
